

# Hello I'm John Wick

## Professional Summary

I'm not just a master assassin; I'm also a master coder! With a passion for technology and a knack for precision, I bring a unique set of skills to the world of web development. Whether it's hunting down bugs or creating sleek user interfaces, I'm your guy.

## Technical Skills

**Front-End Development:** HTML, CSS, JavaScript

**Back-End Development:** Node.js, Express.js, GraphQL

**Databases:** MongoDB, MySQL

**Version Control:** Git, GitHub

**Authentication:** JWT, Authentication Middleware

**UI/UX Design:** Responsive Web Design

**Testing:** Jest, Apollo Client Testing

**Deployment:** Heroku, Netlify

## Professional Skills

**Problem Solving:** I can take on complex challenges and find creative solutions.

**Attention to Detail:** Just like in my hits, I never miss a single detail in my code.

**Team Player:** I work seamlessly with others, just like a well-coordinated operation.

**Adaptability:** Whether it's a change in the target or a change in technology, I adapt quickly.

**Time Management:** I'm always on time, whether it's for a job or a deadline.

**Strong Work Ethic:** I put the same dedication into my code as I do into my missions.

## Experience

Web Developer - Tech Assassins Inc.

2020 - Present

Developed and maintained the company's website, ensuring a seamless user experience.

Implemented a responsive design for the site to cater to both desktop and mobile users.

Created an authentication system using JWT for secure access to sensitive information.

Utilized GraphQL for efficient data fetching, improving site performance.

Collaborated with a team of developers to enhance the site's functionality and resolve issues.

Conducted code reviews to maintain code quality and consistency.

## Hobbies

When I'm not coding, you can find me sharpening my combat skills, perfecting my aim, and ensuring justice is served – all in a day's work for John Wick!
